---

**Beth:**

I contacted Ecoserv directly and asked for a rate sheet and they provided the following. I wanted to check the pricing compared to Lonestar for the FT1002. Would we be saving much if we went direct based upon the attached. He will not be available next week to move on this but will be back the following week. We would also probably need to give him a sample.

Let me know what you think?

Gary,

I've attached the preliminary quote. This is our standard rate sheet with all the parameters. The only thing added was transportation and supervision.

If you have any questions, feel free to call.

Cliff
